SUMMARY

Computer Science student with hands-on Python development experience and a front-end background. Currently upskilling in AI & Data Science (Code With Harry — paid course) and learning Java & MySQL to pursue backend and full-stack internship opportunities.

TECHNICAL SKILLS

Languages: Python | HTML5 | CSS3 | Java (learning) | MySQL (learning)

Tools & Platforms: Git, GitHub, VS Code

Currently Learning: AI & Machine Learning, Data Science (Code With Harry — paid), Java, MySQL

EDUCATION

Diploma in Computer Science Engineering — Galgotias University, Greater Noida 2023 – 2026

EXPERIENCE

Front-End Development Intern — CodSoft July 2024

- Built and deployed front-end web projects using HTML and CSS as part of structured internship tasks.
- Developed responsive, user-friendly interfaces and practised real-world Git version-control workflows.
- Collaborated on task-based assignments, meeting structured deadlines and maintaining clean code practices.

PROJECTS

Jobez — Job Portal Web Application | Python, Flask, HTML, CSS

- Built a full-stack job portal with dual-role support (candidates & employers) featuring job posting, search, and application management.
- Implemented user authentication with hashed passwords, session management, and role-based access control using Flask-Login.
- Developed secure resume upload with file validation and employer-only download access, with a database backend to manage users, jobs, and applications.

Drink Water Reminder App | Python

- Python automation tool that sends timed hydration reminders via terminal and Windows desktop notifications using the plyer library.
- Demonstrates scheduling logic, OS-level notification integration, and lightweight background-process design.

Personal Portfolio Website | HTML, CSS

- Designed and built a fully responsive portfolio to showcase skills, projects, and contact information across desktop and mobile.

HACKATHONS

Bharat Shiksha Hackathon — Participant 2024

- Explored technology-driven solutions for learning challenges at a national education-focused hackathon.
- Collaborated with peers to prototype an ed-tech concept under time-constrained conditions.

ACHIEVEMENTS & INTERESTS

- **State-Level Amateur Boxer** — brings strong discipline, consistency, and a competitive growth mindset to everything.
- Enrolled in a structured, paid AI & Data Science course by Code With Harry, covering ML fundamentals and Python for data science.
- Passionate about open-source projects and continuously building personal projects to sharpen technical skills.
